## SUMMARY

---

I am very driven and constantly improving my skills in the field of AI, Web Development and any other technologies that are required for me to complete my tasks. I study in PCCOE, B.Tech Computer Engineering with hands-on experience in building real-world web apps, Chrome extensions, and automation workflows using JavaScript, React and Node.js which are all referenced below. I am more interested in learning and applying AI integration and automation. I'm currently exploring opportunities to apply and expand my skills through internships and practical projects to gain sufficient experience with how the industry works as a whole.

## PROJECTS:

**Linked in post automater** (<https://github.com/Mohit242-bit/linkedin-post-automater>)

- Built a system that uses GitHub Webhooks and n8n to automate LinkedIn post creation. Triggers a workflow whenever a new GitHub push occurs, generates content using AI, and posts to LinkedIn — reducing manual effort for dev content creators.
- Tech: GitHub, n8n, JavaScript, AI API

**Digital Marketing Agency Website**(<https://mohit242-bit.github.io/DigitalMarketingwebsite/>)

- Designed and developed a responsive website for a digital marketing startup. Focused on clean UI, SEO optimization, and mobile responsiveness. Collaborated with the team for client needs and deployment.
- Tech: HTML, CSS, JavaScript,Api integration ,chrome api

## Auto Blog Summarizer (Chrome Extension)

- Built a Chrome extension that scrapes blog content from the current tab, sends it to OpenAI/Gemini API, and displays a clean summary popup. Useful for students, researchers, and busy readers.
- Tech: JavaScript, Chrome Extensions API, AI (Gemini/OpenAI)
